*MUSHROOM*. *n. f.* [*musheeron*, French.]  
 1. *Mushrooms* are by curious naturalists esteemed perfect plants,  
 though their flowers and seeds have not as yet been discovered:  
 the true champignon or *mushroom* appears at first of a roundish  
 form like a button, the upper part of which, as also the stalk,  
 is very white, but being opened, the under part is of a livid  
 flesh colour, but the fleshy part, when broken, is very white;  
 when they are suffered to remain undisturbed, they will grow  
 to a large size, and explicate themselves almost to a flatness,  
 and the red part underneath will change to a dark colour:  
 in order to cultivate them, open the ground about the roots  
 of the *mushrooms*, where you will find the earth very often full  
 of small white knobs, which are the off-sets or young *mushrooms*;  
 these should be carefully gathered, preserving them in lumps  
 with the earth about them, and planted in hot beds. *Miller.*  
 2. An upstart; a wretch risen from the dunghill; a director of  
 a company.

 Before was never made,  
 But when of old the sons of morning sung. *Milton.*

*MUSK*. *n. f.* [*muschio*, Italian; *musq*, Fr.]  
*Musk* is a dry, light and friable substance of a dark blackish  
 colour, with some tinge of a purplish or blood colour in it,  
 feeling somewhat smooth or unctuous; its smell is highly per-  
 fumed, and too strong to be agreeable in any large quantity;  
 its taste is bitterish; it is brought from the East Indies, mostly  
 from the kingdom of Bantam, some from Tonquin and Co-  
 chin China: the animal which produces it is of a very sin-  
 gular kind, not agreeing with any established genus: it is of  
 the size of a common goat but taller; its head resembles that  
 of the greyhound, and its ears stand erect like those of the  
 rabbit: its tail is also erect and short, its legs moderately  
 long, and its hoofs deeply cloven: its hair is a dusky brown,  
 variegated with a faint cast of red and white, every hair being  
 partycoloured: the bag which contains the *musk*, is three  
 inches long and two wide, and situated in the lower part of  
 the creature's belly; it consists of a thin membrane covered  
 thinly with hair, resembling a small purse, and when genuine,  
 the scent is so strong as to offend the head greatly: toward  
 the orifice of the bag there are several glands, which serve  
 for the secretion of this precious perfume, for the sake of  
 which the Indians kill the animal. *Hill.*
